Altogether Unique.

Vineyard Report 2026

New Zealand Winegrowers

Predictions for 2026-2028 within this document are based on data collected from NZW members in the 2025 Biosecurity Vineyard Register.

Vineyard Report 2026

New Zealand Winegrowers

QUERIES

If you have any questions relating to the Biosecurity Vineyard Register please contact: vineyardregister@nzwine.com

Throughout the document, numerical figures have been rounded, which may result in minor discrepancies.

Planted Hectares (Ha) is the number of hectares of vines planted in the vineyard, regardless of whether they are producing fruit.

Producing Hectares is the number of hectares of vines producing a crop, regardless of whether it is harvested or not.

Examples of planted vines that are not producing include young vines in their first and second years, re-trunked vines, and top-grafted vines before they produce a harvest. Vines that are harvested to the ground, or where fruit is left on the vine or vines that are mothballed, producing some fruit, are considered to be producing.
